
WALKING TO THE HIGH SIDE

Park in the Karioitahi beach carpark - don't leave any valuables visible in your car.

Walk north (turn right if you're facing the water) along the beach for 200 meters, till you cross the waterfall stream flowing down the beach.

Go exactly 40 meters more north past that stream and you'll see (on your right), the entrance to the track up to the top of the cliff with ropes and steps. (It's well hidden so look carefully for a low wooden marker pole) Once you hit the top of the cliff, carry on along the cliff edge track north, another 200-300 meters to the main takeoff. You'll see the weather station mast 30m south of takeoff.

If you hit the next fence at around the 300 meter mark, you've gone 50 meters too far. The take off knoll is 50 meters back from that fence up on the knoll. See you at the top. (Allow 15 - 20mins for the walk)

**Ready to fly on the
HighSide takeoff at
100m above the beach.**
